

**BRAYBROOK  
COLLEGE  
ADVANCED PROGRAM**

(Years 7 - 10)

**SEEK**

(Select Entry for Enrichment and Knowledge)

**YEAR 7 CLASS 2020**

The Braybrook College Year 7 SEEK Program is designed to cater for the educational needs of high achieving students.

This Advanced Program challenges students to perform at their very best in the four core subjects of Mathematics, English, Humanities and Science, as well as in a range of subjects which contribute to the breadth of their educational experience.

The program will require students to study more complex and abstract concepts in class with an emphasis on higher order thinking skills.

Students will remain in the SEEK Program until Year 10 if they continue to excel academically.

**Advanced Class Testimonials**

I entered in competitions in Science, Maths & Humanities – and did very well!

On Awards Night I received a certificate – my parents were very proud.

I got a Leadership Scholarship to come to Braybrook College.

I managed to get a Distinction in the UNSW Science Competition.

I'm proud that I was brave enough to speak to the whole Yr 7 Level.

I got 100% on my PE Test.

My English skills improved so much – I can now write a text response.

I feel comfortable in the SEEK Class.

I made a lot of new friends in this class! We are like one big family because we support each other.

I achieved 100% on my Humanities projects.

Achieving a High Distinction in the National Geographic Competition was fantastic.

Easily adapting to the SEEK Advanced Class.

I am proud of being selected for the SEEK Advanced Class.

Achieving 100% in a Science test.

I coped with all the homework and learned how to be organised.

# Year 7 SEEK Program 2020

## Selection Process for Students

Students entering Braybrook College at Year 7 (refer to the College website for the General Enrolment Policy) have the opportunity to apply for our SEEK Program. Acceptance into the SEEK Program is based on multiple sources of information, including the ACER test results, previous reports and NAPLAN results. In order to apply for the SEEK program, the following process will occur:

- Submit the Expression of Interest form to the College
- Sit an external ACER examination at Braybrook College
- Attend an interview at the college (only students who have achieved the required standard on the ACER test will be selected for this stage)
- A successful interview will confirm acceptance into the program
- Parents will receive the results of the examination and notification if their child has been successful
- 25 Students will be selected for the 2020 Year 7 class, with some selected to be on standby

## Aims of the Program

Students will:

- Develop deeper-thinking skills and problem-solving skills
- Work independently and in a team
- Show initiative and organisation
- Take up the opportunity for enrichment, challenge and self-motivation.

## Year 7 Course Structure

- All Year 7 students have the opportunity to study a wide range of subjects including Art, Drama, Physical Education and Music. We also offer numerous co-curriculum activities including sport and camps
- Core subjects of English, Mathematics, Science, and Humanities will be enriched

## Expectation of Students

Students should be hard working and capable of performing at the top of a normal class. Our selection process allows us to assess the suitability of applicants.

Placement in the program is a privilege and students must make a commitment to perform at their best. Work expectations will be greater than in a normal class.

## Student Performance

The progress of students will be monitored by the class room teachers and the Program Coordinator. Students must maintain the necessary academic performance to remain in the program. Students unable to perform will be returned to the normal classroom program after consultation with parents and teachers.

Students will remain in the program until Year 10 and if they meet certain criteria they will be offered some VCE subject choices.

Braybrook College is proud to offer a Year 7 Class especially designed to cater for the learning needs of the more academically talented students that adds to the wide variety of curriculum and co-curriculum opportunities already established. The SEEK Program encourages students to seek knowledge and skills so that they can achieve to their full potential.

**Would you like the opportunity to be selected for the Year 7 SEEK class?**

**Are you 'above average' in your class?**

Further details can be obtained directly from Braybrook College by contacting: Ms J. DeSilva or Ms E. Gunter - Program Coordinators on 9312 2900
